

IsatPhone

Mobile satellite phone

For most people, the ability to make a phone call is the first communications priority when they arrive in a remote location. If your requirement is simply that, Inmarsat offers IsatPhone.

## **Overview**

- Pocket-size handset
- Easy to use
- Rugged design
- Dual mode satellite/GSM
- 2 hours 40 mins talk time
- Range of accessories

## **Competitive price**

Robust, compact and competitively priced, IsatPhone is ideal for business travellers and personal users who travel or work in areas where local networks are unreliable or non-existent.

## **One-stop shop**

IsatPhone adds to Inmarsat's comprehensive portfolio of voice and data services, ultimately offering our customers a unique 'one-stop shop' for global mobile satellite services.

## **Coverage**

IsatPhone can be used within Asia, Africa and the Middle East, using Inmarsat's latest generation I-4 satellites.
