Share Your Adventures! SPOT Adventures is the free online community where you can share your location updates in near real time via your SPOT Live Map using Google Maps™. Your SPOT Adventures account allows you to create a profile, save your adventure maps, add photos and write personal stories. Each saved adventure is like a trip diary for you to keep or to share with friends. www.SPOTadventures.com

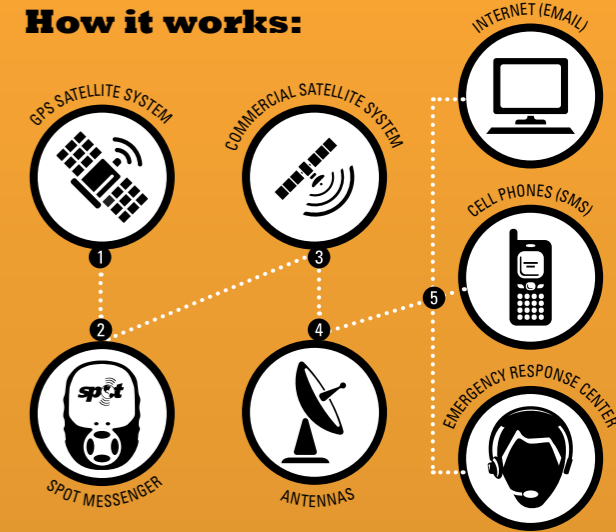

Stay connected – around town or around the world.

Traditional GPS devices tell you where you are. Only SPOT uses communications satellites to tell your contacts where you are and how you're doing. If needed, alert an emergency response center. SPOT has helped initiate rescues around the world, even from some of the most remote places.

- 99% or better probability of successfully sending a single message within 20 minutes.
- 96% to 99% probability of successfully sending a single message within 20 minutes.
- Reduced or no coverage available within a 20 minute period.
- No coverage.

How it works:

- 1 GPS satellites provide signals.
- 2 SPOT messenger's onboard GPS chip determines your GPS location and sends your location and preselected message to communication satellites.
- 3 Communication satellites relay your message to specific satellite antennas around the world.
- 4 Satellite antennas and a global network route your location and message to the appropriate network.
- 5 Your location and messages are delivered according to your instructions via email, text message, or emergency notification to the GEOS Rescue Coordination Center.

Basic Service Plans

1-year plan: \$99.99 · 2-year plan: \$199.98 Includes SOS/911 · Check-in/OK · Help
